

SMARTPRESS

POCKET FOLDER

*Finished Size: 6"W x 9"H
with a single 3" inside left pocket and no business card slits*

BACK COVER

COVER

BLEED: Your file needs to include a 0.125" bleed necessary for production. Bleed is printing that goes beyond the edge of the sheet after trimming. If a bleed is not included in document setup, there is a good chance there will be a gap between the edge of the printed area and the cut line. This happens because there is a tolerance when cutting the printed piece. For more information on the importance of bleed, visit our website: smartpress.com/support/printing-basics/bleed-borders.

CUT LINE (FINISHED SIZE): This is where your artwork will be trimmed.

SAFE MARGIN: Your file needs to include a 0.125" safe margin necessary for production. Safe margin is the area around the edge of the sheet. If the safe margin is not included in document setup, there is a chance that the art close to the edge will get cut off, due to machine shift during cutting. This happens because there is a tolerance when cutting the printed piece. For more information on cutting tolerance, visit our website: smartpress.com/support/printing-basics/cutting-tolerance.

FOLD LOCATIONS: The pink lines indicate where the folds will be.

THIS PANEL
UPSIDE DOWN

THIS AREA COVERED BY POCKET.
NOT VISIBLE WHEN FOLDED

The diagram shows a complex layout of rectangular panels. A central vertical line separates the left and right sides. The left side has two stacked rectangular panels, both shaded light gray. The top panel contains the text 'THIS AREA COVERED BY POCKET. NOT VISIBLE WHEN FOLDED'. The bottom panel contains the text 'THIS PANEL NOT VISIBLE WHEN FOLDED'. The right side is a single large white rectangular panel. The entire layout is enclosed in a blue border. The left panel is further enclosed in a green border, and the bottom panel is enclosed in a magenta border. A small green tab-like shape is attached to the left edge of the bottom panel.
