

SMARTPRESS

# POCKET FOLDER

*Finished Size: 9"W x 12"H  
with 4" inside pockets and left pocket business card slits*

COVER

**BLEED:** Your file needs to include a **0.125"** bleed necessary for production. Bleed is printing that goes beyond the edge of the sheet after trimming. If a bleed is not included in document setup, there is a good chance there will be a gap between the edge of the printed area and the cut line. This happens because there is a tolerance when cutting the printed piece. For more information on the importance of bleed, visit our website: [smartpress.com/support/printing-basics/bleed-borders](http://smartpress.com/support/printing-basics/bleed-borders).

**CUT LINE (FINISHED SIZE):** This is where your artwork will be trimmed.

**SAFE MARGIN:** Your file needs to include a **0.125"** safe margin necessary for production. Safe margin is the area around the edge of the sheet. If the safe margin is not included in document setup, there is a chance that the art close to the edge will get cut off, due to machine shift during cutting. This happens because there is a tolerance when cutting the printed piece. For more information on Cutting Tolerance, visit our website: [smartpress.com/support/printing-basics/cutting-tolerance-for-print](http://smartpress.com/support/printing-basics/cutting-tolerance-for-print).

**FOLDS:** The orange lines indicate where the folds will be.
